EXPERIENCED FRONTEND DEVELOPER (F/M/D)

Zortify generates and delivers information about people based on text analysis and AI.We provide insights on personality traits that strongly correlate with business success. Zortify makes it possible to reliably assess people through artificial intelligence. The unique combination of self-assessment data with text analysis allows the Zortify algorithm to validly predict personality traits highly relevant to professional success.Although the potential applications of the Zortify AI are multifold, we currently generate our revenue from these use cases, Top-Executive selection, Automation of recruiting, Coaching & Leadership development, Personality checks for investors... much more (text based) are in the pipeline and the rest is up to your fantasy! Zortify provides Artificial Intelligence for Human Decision Making!
